Handsome, strictly modern, ter-room, eastfront residence, stable, large shade trees in front and rear. Terms satisfactory. Great opportunity. Situated in best part of Morton Place, No. 2024 Alabama street.

C. F. SAYLES. 135 East Market Street.

HOW GOUNOD WON.

The Composer of "Faust" Tells of His First Struggle.

New York Herald. Shortly before his death Gounod wrote a brief sketch of the manner in which he became a musician, and this has just been published for the first time by the Petit Bleu, of Paris. It is wholly from Gounod's pen, and, as an autobiographic fragment, will surely prove of much interest to all admirers of the famous composer of "Faust."
"I was thirteen years old," he begins, "and was a pupil at the Harcourt School. My mother, a poor widow, was obliged to work hard for her living and had to trudge through snow and sunshine in order to obtain the means for her children's education. I was continually worried over the thought that she was sacrificing herself for me, and I longed for the day when I could set her free from her unworthy labor. Her views,

enticing voice saying, 'You must be a mu-"One day I told my mother about my

however, in regard to my future differed

heart's desire. " 'Are you in earnest?' she asked. "'Yes; in dead earnest."

" 'And you will not go to the university? " Never!"

"'Where will you go, then?" " To the conservatory." "It was now her turn to say Never." med fated then that I was to remain at the Harcourt School until I had finished my studies, and that, if misfortune still dogged my footsteps at that time. I would have to become a soldier. I could not look to my mother for any help. She would rather that I should do anything else than become a vagabond musician. 'My dear mother,' I finally said to her.

'I will stay at school, since you wish it, but one thing I am determined on, and that is I will never become a soldier. Do you mean that you will not obey law, which calls for military service? 'No. but I mean that the law will be a dead letter so far as I am concerned. What do you mean?" "I mean that I will win the "Prix de

which will free me from the necessity of becoming a soldier. "My mother then abandoned the idea of trying to make me change my mind. She decided, however, to lay the matter before Father Pierson, my school principal. The olly old gentleman summoned me and began in a fatherly tone of voice: 'So, my little fel-low, we are going to spend our life among musicians?

"'Yes, Mr. Pierson."
"But music! Is that a profession?"
"What about Mozart, Meyerbeer, Weber, Rossini? Didn't they have a profession?" The good principal was somewhat taken aback and replied hastily: 'Oh, Mozartthat's a different matter altogether. He gave proof of genius when he was only your age. But you! What can you do? Let us see. With these words he scribbled on a sheet of paper Joseph's ballad, beginning. When my childhood was past.' Then he handed me the sheet. 'Come, let me have some music for these words.' I ran off and two hours later came back to him with my first musical

" 'Good gracious!' said the old gentleman. You're a terrible fellow. Go ahead and sing your little song now." 'Sing? Without a plano?'

"'What do you want a plane for?' "To play an accompaniment. It is impossible in any other way to set forth the true harmony of a work.' "'Oh, nonsense. I don't care a fig for your harmony. What I want to know is whether you have any ideas, any true musical temperament. Go ahead now. 'I began to sing. When I had finished I glanced timorously at my stern critic. Tears stood in his eyes, tears were rolling down his cheeks. I saw that he was strangely moved and I was not surprised to find myself the

"It is beautiful, beautiful, my boy," he said. 'We will make something out of you. You shall become a musician, for the real fire is in you.'

next moment in his arms.

"In this way I gained a champion. Finally my mother took me to Reiche, my first music teacher. She was still troubled about me and she whispered into Reiche's ear: 'Don't let him have an easy time. Let him see the dark side of the musical profession. I will bless you if you send him back to me a

'Reiche, however, could not please her in this way. After a year he was obliged to say to her in reply to her inquiries: dame, you had better content yourself. Your boy has talent. He knows what he wants and nothing can discourage him. He knows already as much as I do and there is only one thing which he does not know-namely, that he knows something.' "I knew this also, however, for every one

who is not an ass possesses self-consciou ness. Three years later I won the 'Prix de Rome' and I had accomplished my heart's

NEW PSYCHOLOGICAL CLUB. Phenomena."

New York Evening Post. A society for the investigation of psychic phenomena, on lines similar to those pursued by the English Society for Psychical Research, is about to be incorporated. A number of well-known physicians and other scientists of the city, are interested in the proposed "Psychic Study Club," which will meet to-night for organization at No. 57 West Forty-sixth street, Dr. Henry Frank, minister of the Metropolitan Independent Church, is the originator. Speaking of his plans to-day he said:

"I have had in mind for a long time the formation of a society for the investigation of psychic phenomena on strictly scientific lines, but until two or three weeks ago the matter had not taken definite form. These investigations will be carried on with the strictest precautions against all manner of fraud and charlatanism, and several wellknown alienists, including Dr. Spitzka and of investigations similar to those of Dr. Charcot at the Salpetriere Hospital, in Paris. Not only mesmerism, hypnotism, telepathy, animal magnetism, mental suggestion, spiritualism, mind cure, etc., will be investigated, but also the pathological nature of insanity, epilepsy, dipsomania, and kindred affections of the nervous system will be made the subjects of special study. in order to learn their bearings upon the

The various aims of the club might be outlined as follows: To collect and sustain a library containing all literature of importance that is germane to the subject; to establish headquarters; to organize branch try; to hold regular meetings for scientific study and inspection of so-called psychics or mediums and for public lectures. "In regard to the inspection and investigation of so-called psychics or mediums, I want to say that those investigations will be conducted under the supervision of the ablest and most eminent alienists. This will be done from a strictly scientific point of

science of psychology.

"Several well-known neurologists and scientists have promised to lecture for us on this and kindred subjects. These lectures will be open to the general public, and may be made a strong educational factor in the elimination of superstition from the minds of the people. In almost every family there have been peculiar experiences which are unaccounted for, and stories of ghosts and spirits are connected with particular families and houses.

"A professor of psychology in one of the great universities has already given in his name as a member, and prominent persons have acknowledged their interest and willingness to co-operate, for no subject that confronts the age has so fascinated the minds of serious and studious people as so-

A Borrowed Argument.

Cleveland Plain Dealer. Doesn't your pap ever lick you?" "I guess not. Every time he threatens to lick me I read him an extract from his great enti-imperialism speech in which he said: These Filipinos are like wayward children, out have we on that account the right to take away their God-given privilege to do. The following table, prepared by L. W. as they please? Let us treat them as we would our own wayward children, plead with range of quotations: them, beseech them, but never coerce them with either gun or rod."

"That's a good deal to remember."

HENRY CLEWS'S VIEWS.

Henry Clews, in his weekly New York

financial letter, says: "During the past week,

Wall street has shown some abatement in

speculative operations. Such a high state of

excitement as has prevailed for nearly four

months past, almost without intermission

and, at the present moment, affairs seem to

be drifting towards a breathing spell. The

capitalization of new industrial organizations

since Jan. 1 has undoubtedly been quite

large, and the distribution of such a mass

of securities requires some time, and it is

of distribution has made some considerable

progress. It is not to be supposed, however,

is placed directly on the market. A large portion is taken by the stockholders in the

that the entire gross amount of these issues

permanent investment by its recipients, and

therefore to that extent, at least, can have

Another considerable portion of the issues

ganizations to provide a reserve resource.

provided for on a liberal scale, so as to pro-

vide the concerns with a large ready money

resource and make them the less dependent

on borrowing facilities. From these facts it

easier, while the consolidation movement

"I take it that the present abatement of

activity in the industrial and traction

stocks is due to those engaged in these new

interests having concluded that the policy

of moderate movement rather than of hasty

rushing is most conducive to the cultivation

zation of industrial capital. The movement

has come in obedience to a series of nat-

ural causes, and, if it is protected against

the taint of overcapitalization, these issues

sically legitimate, create distrust and prej-

udice when they are pushed with an energy

"In the absence of acute excitement in

the industrials somewhat more attention

not been particularly animated. The reports

year reached 295,000,000 bushels, or 100,000,000

likely to continue until the fall months.

The treasury has so arranged its withdraw-

stiff rates here would be apt to bring cur-

Fort Wayne 184

At New York Saturday money on call was nominal with no loans.

Prime mercantile paper, 31/2641/4 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.8634@4.87 for demand and at \$4.84%@4.85 for sixty days; posted rates, \$4.85\\@4.86 and \$4.87\\@4.88; commercial bills.\$4.84@4.8414.

Silver certificates, 60@60%c; bar silver, 5914c; Mexican dollars, 47%c. At London bar silver was steady at 271/2d an ounce. The New York weekly bank statement

shows the following changes: Surplus reserve, increase......\$4,070,375 Legal tenders, increase...... 2,103,200 Deposits, decrease 4,078,700 Circulation, increase 79,700

The banks now hold \$24,175,900 in excess of the requirements of the 25 per cent. rule. The New York Financier says: "The New York banks added \$3,684,700 to their cash holdings last week, making a gain of about \$6,500,000 since April 8. Within the same period reserve requirements, owing to the shrinkage of \$10,565,700 in deposits, decreased about \$2,650,000, so that the excess reserve has expanded \$15,000,000 in the comparatively short space mentioned. This change, which, of course, tends to an easier condition of the money market, has been brought about in the resumption of the interior movement in this direction and by the liquifrom my own. She had destined me for a university career, whereas I ever heard an dation in loans which has been a characteristic feature of the statement for several weeks past. The loan item discloses the fact that, since the opening of April, a con-has taken place. Obviously, in the face of a Lead pref settled, and, as the factors which make for an expansion of excess reserves are still Tennessee Coal and Iron... 64% 64% 63 prominent, the future holds out the promise of still easier conditions. The current statement, however, when studied in detail, presented some anomalous features. Thus, one institution, which has strong foreign connections, has decreased its loans no less than \$9,000,000, and its deposits and specie accounts show corresponding changes. This may have occurred in the usual course of business, but the sterling loans made in this center a fortnight ago and the imminency of the settlement of the Philippine indemnity may not have been without influence. The financing of indus-trial combinations and the settlement of heavy railroad deals are responsible for some of the unlooked for changes in the individual institutions from week to week, but as these are now generally provided for the weekly exhibit of totals may be more easy of interpretation. Taking the statement in a broad sense, it means, if anything, that the banks are recuperating the losses sustained during the crop movement early in the spring and also since they have concluded the operations incident to the financing of various large deals, that from this time on they will have loanable funds revive sagging speculation or it may inspire a resumption of trust formations, checked probable owing both to exhaustion of suitable material and the indisposition to encourage the trust habit. As for speculation, not surprising if there be some postponethere are too many conflicting features from | ment of further creations until this process foreign money markets to domestic crop and other causes to make a prediction of

much value." Total sales of stocks were 306,714 shares including: American Steel and Wire, 5,600; American Sugar, 16,600; Anaconda, 7,900; Atchison preferred, 8,100; Brooklyn Rapid Transit, 16,300; Brooklyn Rapid Transit, rights, 2,000; Burlington, 4,700; Chicago Great Western, 3,500; Colorado Coal and Iron, 5,400; Colorado Fuel and Iron, 5,500; Continental Pobacco, 28,400; Denver & Rio Grande, 15,000; Federal Steel, 5,300; Louisville & Nashville, 16,900; Manhattan Consolidated, 12,500; Manhattan Beach, 22,800; Mexican Central, 10,200; Missouri Pacific, 4,300; National Steel, 8,800; New Jersey Central, 3,500; Norfolk & Western. 3,900; Norfolk & Western preferred, 8,800; St. Louis & Southwestern, 2,000; St. Louis & Southwestern preferred, 2,200; St. Paul, 2.200; Southern Railway, 3,700; Southern Railway preferred, 16,900; Tennessee Coal and Iron, 12,900; Wheeling & Lake Erie,

Saturday in New York the market was almost wholly professional and the net changes were trivial, although in the way of improvement. The specialties monopolized attention except for activity in some of the internationals. In the early trading an expected favorable bank statement was discounted and on its appearance general realizing followed, the appearance of a supply of stock from large holders giving encouragement to the bears to put out short lines and the market closed with a raid in progress. The bank statement showed a large increase in loans and deposits and a consequent heavy gain in surplus reserve. London sold freely of Louisville, Southern preferred and Denver & Rio Grande, but those stocks were very well taken and all closed at good advances. Norfolk & Western shares were the only other particularly strong railways. Sugar was strong throughout and gained 24. Brooklyn Transit moved irregularly, slightly above yesterday's figures. Among other specialties Continental Tobacco was pressed for sale early on the increased capitalization, but railied on sup-porting orders and closed with a gain of 2 points. Tennessee Coal and Iron was weak, losing a point. New Jersey Central was helped by the announcement that certain high rate bonds would be refunded by the issuance of bonds to be subscribed for by violent movements. These issues and standing in the stock market, the same as they have in London and continental exchages. But issuance of bonds to be subscribed for by violent movements. The large issues are included by the lost in the days of the civil war and of the time when stock market, the same as they have in London and continental exchages. But it is the old sideboard or wine press which Will Investigate So-Called "Occult | issuance of bonds to be subscribed for by present stockholders. The market closed weak. The level of prices for the week was not much changed, declines only slightly exceeding in number the advances. The dealings were of a highly professional char-acter, the public being rather indisposed to let go their present holdings or to take on week showed no marked abatement of prosperity in various lines of industrial activity. The imports for March were the larg-

new lines and prices of individual stocks as a rule rose or fell only at the will of manipulators. The trade reports for the est in nearly two years, nevertheless the excess of exports reached nearly \$33,000,000, largely due to a gain in manufactured products, as the exports of cereals, cattle and raw material fell off about \$18,000,000. Sterling exchange was strong, with an insufficiency of commercial bills. It was thought that preparations for the payment of the Spanish indemnity figured in the exchange market. Money on call showed a variable tendency, alternately easy and firm with ease generally prevailing. Loanable funds were increased by receipts of money from Baitimore and Philadelphia. The bank clearings of the United States

reflecting the comparative apathy in spec-

ulation, decreased for the week over \$94,000,-

000, but were still greatly in excess of those of last year. The grain market's strength, supposedly reflecting an expectation of a shrinkage in the cereal yield, was watched narrowly for its effect on the grangers. This group of stocks moved within compressed limits. while Burlington advanced about 2 points on the subscription privilege extended to stockholders. The professional element showed a frequent disposition to be bearish, while real holders of stock generally clung tenaciously to their favorites, but the liq-uidation of speculative holders was not conducive to an increase in the short interests, which acted as a support to values on concessions. Frequently, after a long period of inactivity, business suddenly in-creased as though it had been prearranged. The more notable changes in prices for the week were declines: Third avenue, 91/2; Brooklyn Transit, 4; Manhattan, 3%; People's Gas, 3%; New York Central, 2, and Lackawanna and Northwest, ½ each. The advances include: New York Air-brake, 11; Colorado Fuel, 10%; Colorado Fuel preferred, and New Haven, 7½ each; Anaconda

Mining, 8; National Steel, 4; New Jersey Central, Delaware & Hudson and Louisville, over 3 each, and Southern preferred, 246. There was talk at one time of a recurrency of discrimination in loans against the industrials, but less was heard of this with the easing of money. There were sales for Western account on several occasions which were taken to be connected with information on crop prospects. Railway earn-

ings that appeared during the week were generally favorable. Considerable favorable comment was aroused by the investment inquiry for bonds, which included middle class as well as prime grades. The market displayed pronounced strength throughout, moving independently of the stock market. United States twos, registered, threes, registered, and new fours, registered, advanced threes, coupon, and old fours, registered. in the bid price.

A RELIC OF LINCOLN RECOVERED. The Sideboard Which Used to Serve Him in the White House.

Washington Post. In the possession of Mrs. A. R. Perlie this city, is an interesting relic of the days of the civil war and of the time when Lenox fancy, 18c; Muthuen A4, 91/2c; Oakland | stood throughout the time of the war in the dining room of the presidential mansion. Aside from the historic interest which attaches to this antique piece of furniture, on account of its having been in the posses-In showing the historic relic to a reporter

> into her possession. "It was in 1886 that I moved to Washingbelongings had been sold out at sheriff's sale by the landlord in order to pay her rent, which had fallen behind. Some of the window shades had been overlooked in the general sale and she had returned to see if I wanted to buy them.

Mrs. Perlie told the story of how it came

"I told her that I would give her for them whatever they were worth. She then asked me if I had seen Lincoln's sideboard. I told her that nothing had been left in the house except an old cupboard down in the kitchen, and that I supposed that no one wanted it at the sale on account of its being so unwieldy. She then told me that the old cupboard was formerly the property of President Lincoln. Her uncle had been one of the President's favorite servants during his first term at the White House. Mr. Lincoln had given it to him toward the close of his first term, and at that time it was an exceedingly handsome piece

dent Lincoln highly and had left it upon his death to his niece. She, however, had been unable to utilize it in any way as an ornament to her parlor, and when her finances became so involved had taken it down in the kitchen, where it was used as found that upon the back of the old piece of furniture were credentials showing that it had belonged to Lincoln and had been given by him to the uncle of the woman who formerly owned it. The woman told her that the sideboard had been formerly surmounted by a handsome mirror and that the with copper, while those intended for silver

been torn out by the people conducting the sale and the mirror had been removed as

Mrs. Perlie paid the woman a few dollars for the old sideboard and she left thinking herself well rid of it. At that time the craze for antique furniture had not come into being, and Mrs. Perlie determined to have the old sideboard modernized. Accordingly she sent it to a cabinet maker and had eighteen inches of its depth cut off. She also had new drawers fitted into it and new uses it as a chiffonier. When it was extra clean, 60@75c; orchard grass, extra. \$1@1.10; the doors are of heavy brass, and altogether

SHORT SELLING

REARS BELIEVE WHEAT IS DUE FOR A MARKED REACTION.

Outsiders Not in the Market and Prices Sag 1 1-8c for Lack of Support-Other Markets Weak.

CHICAGO, April 22.-Liquidation and short selling to-day on prospects of rain caused a decline in wheat. At the close May and July both showed a loss of 11/4c. Corn declined %c and oats 140%c. Pork lost 5c and lard and ribs 2465c each. Wheat opened steady on better Liverpool

cables than expected. There was a lack of outside trading, however, and prices soon eased off, the weakness becoming quite pronounced on predictions of general rains where badly needed in the South and Southwest. Liquidation was heavy and there was a good deal of short selling. May started 1/8c higher at 731/2c and declined steadily to \$3.571/2; new, cash and April, \$3.75. 7234c at the close. July opened at 74%@745c 27s 6d; American refined, 28 lbs, steady at 28s, and sold off to 7314@73%c, the closing price. Private crop damage reports were less numerous than heretofore. Chicago received sixty-three cars, seven of which graded contract. Minneapolis and Duluth got 297 cars, against 2'8 for the same day a year ago. World's shipments to Europe for the week were estimated at 6,000,600 bushels. Atlantic port clearances in wheat and flour equaled 542,000 bushels.

Corn declined under moderate liquidation, increased country offerings and heavy recepits. There was a fair shipping demand. Receipts, 240 cars. May started a shade lower at 344@34%c, sold sparingly at 34%c,

then declined to 34c at the close. Sympathy with other grains and free realizing by longs caused a decline in oats. There was a good cash demand from the East. Receipts, 175 cars. May opened a shade higher at 26% c and declined to 26% c at the close. Free deliveries of hogs and the weakness in grains depressed provisions. May pork opened 2½c lower at \$9.15, rose to \$9.20, then reacted to \$9.12½, sellers at the close. The range in lard and ribs was small. Estimated receipts for Monday-Wheat, 72 cars; corn, 227 cars; oats, 200 cars, and hogs,

Leading futures ranged as follows: Articles. Clos-Low-High-Wheatest. ing. 7316-7316 July.... Sept....
